FARIBAULT COUNTY JUDICIAL DITCH #22 HEARING NOTIFICATION

May 24th, 2023

System: Faribault County Judicial Ditch #22

Location: Verona Township Sections 21-23, 26-28, 33-34

RE: Redetermination of Benefits Final Hearing

Dear Landowner:

There will be a redetermination of benefits hearing on Faribault County Judicial Ditch #22 (JD22F) held on **Tuesday, June 20th, 2023, at 2:30 pm at the Board Room at the Faribault County Courthouse** (415 North Main Street Blue Earth, MN 56013). A redetermination of benefits was ordered on September 20th, 2022, due to the benefits not reflecting reasonable present-day land values and change in the benefited area. This meeting will cover the benefit values. The Viewers' Report can be viewed at the Faribault County Auditor's Office or online at <https://www.co.faribault.mn.us/drainage/pages/notices-reports>. **See enclosed public notice for more information on the proceeding.**

Landowners can join this meeting 1 of the following 3 ways.

1. In person at the Faribault County Courthouse Board Room (415 North Main Street Blue Earth, MN) ***Map on Back**
2. By phone/call-in
3. By Zoom (internet meeting)

If you would like to join the meeting via Zoom you will need a computer, internet, microphone, and speakers. If you do not have a microphone built into your computer, you can call in as well to be able to hear and talk. **If you would like to join via Zoom and/or phone/call-in, please contact the Drainage Department by phone 507-526-2388 or email merissa.lore@co.faribault.mn.us by June 16th, 2023, for information needed.**

At the public hearing, the Viewers will present information about the redetermination of benefits and the Drainage Authority will accept public comment regarding the Viewers Report. If you have questions or concerns, please contact the Faribault County Drainage Department at the office 507-526-2388 or by email merissa.lore@co.faribault.mn.us.

Viewers Report

(Final)**

Valuation prior to drainage

Beginning land use, property value, and economic productivity have been determined with the consideration that the benefited properties within the watershed originally did not have an adequate outlet for artificial drainage.

- "A" – Standing water or cattails, wetland classification with economic productivity for agriculture purposes of \$0 per acre, and a market value of \$1,000 to \$2,000
- "B" – Seasonally flooded/pasture ground. Pasture classification with economic productivity of \$110 per acre based on grazing days and/or hay values, and a market value of \$2,500 to \$3,500.
- "C" – Wet subsoil – Generally farmable land with moderate crop potential, with annual economic productivity of \$542 per acre based upon average annual yield of 70% of optimum with \$329 production costs, and a market value of \$4,000 to \$5,000.
- "D" – Upland areas not needing much artificial drainage and intermixed with wetter soils, with annual economic productivity of \$658 per acre based upon an average annual yield of 85% of optimum with \$329 production costs, and a market value of \$5,000 to \$6,000.

Valuation with NRCS recommended drainage

Potential land use, property value, and an increase in economic productivity, after public and private drainage have been installed as NRCS design standards as recommended in the Minnesota Drainage Guide, using current crop rotation, income, and expense.

- "A" – Drained slough area, medium classification land with economic productivity of \$581 per acre based upon average production of 75% of optimum with \$329 per acre production costs, and a market value of \$5,000 to \$6,500.
- "B" – Well drained ground, high land classification with economic productivity of \$619 per acre based upon average annual production of 80% of optimum with \$329 production costs, and a market value of \$5,500 to \$7,500.
- "C" – Well drained ground, highest land classification with economic productivity of \$666 per acre based upon average annual production of 86% of optimum with \$329 production costs, and a market value of \$6,500 to \$9,000.
- "D" – Well drained ground, high land classification with improved farm ability, with economic productivity of \$720 per acre based upon average production of 93% of optimum with \$329 production costs, and a market value of \$5,500 to \$7,500.

Utilizing these productive values, potential benefit values were determined for the system based upon a 25 year effective life with proper maintenance. Private tile improvement cost were depreciated over the same 25 year period, and an allowance of 0.5% return on the system investment. A three year average Township yield was used for the benefit value calculations along with a three year average sale price for the corn and beans.

Summary

Faribault County JD-22 consists of 885.96 acres of farmland, roads and building sites with benefits of \$1,287,607. JD-22 is in Verona Township in Faribault County.

- a. 856.11 acres of farmland and building sites with \$1,243,592 of benefits
- b. 29.85 acres of County and Township roads with \$44,015 of benefits
- c. 885.96 total acres with \$1,287,607 of benefits

Benefit values were adjusted based on multiple factors including location to the County tile, drainage coefficient, and soil type.

Average land benefits, (reduced) over a 25 year period are \$1,424 per acre

- a. A soil \$2,293
- b. B soil \$1,750
- c. C soil \$1,136
- d. D soil \$515

Building site benefits

- a. (Average of B + C + D soils) X 1.5 = **\$1,701**

Ponds, woodland, and non-benefited acres

- a. **\$0**

Road benefits

- a. Gravel roads, County or Township
(Average land benefit) X 1.0 = **\$1,424**
- b. Paved roads, (wide) State or County
(Average land benefit) X 1.25 = **\$1,779**
- c. Paved roads, State or County
(Average land benefit) X 1.5 = **\$2,135**

Tile benefits

- a. A tile benefit was given for most County tile at a rate of **\$0.50 per linear foot**. This value was given because of the ease of access for private tile, and for the drainage the County tile may provide. 24,985 feet of County tile in Faribault County JD-22 with **\$10,075 of tile benefits**

Crop damages

Crop damages will be paid per acre on standing crops damaged by construction or repair on the County tile, as determined by the Faribault County Drainage Department.

Benefits and damages statement

This report covers the redetermination for a previously constructed drainage system. The basis for determining benefits and damages is therefore, based upon a comparison of the conditions that would have existed prior to the County tile systems construction, with those that do exist with the drainage system in a reasonable state of repair. Supporting documentation for the analysis and conclusions of the report are contained in our files and are available for inspection. The figures stated herein are based on a full and fair comparison of all pertinent facts and information that we were aware of at the time of this redetermination process. The following aids were used in this viewing process.

- Faribault County online GIS parcel information site
- USDA web soil survey
- Google Earth aerial satellite photos
- Yield averages taken from USDA national agriculture statistics service
- Production costs taken from University of Minnesota FinBin
- Average commodity sale prices taken from University Finbin
- Sales data from Faribault County Assessor offices and websites
- Visual inspection of each 40 acre parcel or less
- Consultation with Faribault County Auditor / Treasurer Office and the Faribault County Drainage Department

The Viewers determined that the lands affected by the drainage system are generally similar and that the following comments refer to all such tracts.

1. Existing land use, property value and economic productivity:

Land is presently used for building sites, roads, and for agricultural purposes. The property value is consistent with most agricultural land sales within Faribault County. Agricultural lands are primarily used for the production of corn and soybeans. The land has good economic productivity when properly drained.

2. **Potential land use, property value and economic productivity from the drainage system:**

The drainage system has been in existence for many years and provides drainage for agricultural purposes. The property value is consistent with most agricultural land sales within Faribault County. Land affected by the drainage system has the potential to produce above average yields.

3. **The benefits or damages from the drainage system:**

Benefits derived by lands affected by the drainage system are due to (A) Improved capacity to remove surface waters due to previous construction and maintenance of the County tile system, which results in an increase in the current market value of property; or (B) an increase in the potential for agricultural production as a result of the previous construction and continued maintenance of the drainage system; or (C) increased value of the property as a result of potential different land use.

4. There is no damage to any riparian rights.
5. There are no acres added to any tract or lot and there are no public waters, wetlands, and other areas not currently being cultivated, that are proposed to be drained in this proceeding.
6. There are no acres which before the drainage benefits could be realized would require a public waters work permit to work in public waters under 103G.245 to excavate or fill a navigable water body under United States Code, Title 33, Section 403, or a permit to discharge into waters of United States under United States Code, Title 33, Section 1344.
7. There are no acres being assessed for drainage of areas that would be considered conversion of a wetland under United States Code, Title 16, Section 3821, if the area was placed in agricultural production.
